FUN WITH PHOTOS

This is one of the times of the year that photos are used for family and festive ideas. Whether you:

- Have family portraits taken and gift them
- Create your own Christmas card (electronic or printed)
- Create invitations to Christmas and New Year's parties
- Dinner place setting name tags
- Gift tags
- Photo calendars

It does not have to be Christmas related, you can do wedding invitations , Birthday cards, Valentine Cards Get well cards or even all occasion note cards.

All of these are great ways to be creative and present your photos for a purpose and showing them off to friends and families.

If you are creative let your imagination go and creative your photo projects from scratch.

> If you have specialty program or just use power point or Excel you can create your own templates

If you are not so creative, there are lots of downloads on the web or Box Store web sited to act as ideas or templates to create your own project.

> Web sites like Costco & Vistaprint not only offer templates but they also offer printing.

Here are some important things to remember when you create your own templates:

- If you use standard sized paper (8 ½ x 11 ½) you want to use the bottom of the page for the front of your card so it is located properly when you fold the paper.
- If you are printing an inside to your card, be sure to print a test sheet to determine where you inside design has to be located to end up in the correct orientation in your card.
- The test sheet also make you aware of how the paper feeds through your printer to end up printing on the card in the correct location. You most likely have to load the paper with the side you want printed to be down in the tray.
- Create and save your template so you can use it for other card purposes

Power point:

Fold point

Inside of card is on the back

Front of card

Kawartha Camera Club

Power point also lest you add photos , various frames & fonts

Kawartha Camera Club

Excel:

    I like to use excel for a template because the grid is created by the cell boundaries. This helps with positioning.

Front of card

Inside of card

This is a bi-folded card
It will be a ¼ page when completed.
You can insert photos , fonts clip art etc to create your card.
